## Key Applications

- Rail Infrastructure
- Train Operating Companies
- Emergency Response
- Fire and Rescue

The ML500 is a high performance, extremely compact rechargeable handlamp with the power and durability normally only seen in handlamps several times the size. It is proving indispensable to professionals in many different applications around the world. The product has sophisticated control electronics and NiMH cells to give long usage times, powerful light output and fast and reliable recharge.

The ergonomic design is very comfortable to use and the compact size and lightweight mean it can be clipped onto a jacket/belt without getting in the way. The option of the signalling LED's further enhances the capabilities of this product.
