

# INKLINATOR<sup>®</sup> TYPE 2P

Angle instrument for non cab drill rigs

- Small size
- Good accuracy
- Easy to read
- Easy to mount
- Cost-effective

TRANSTRONIC AB

Inklinator 2P measures side and inclination angles which makes it possible to drill in predestinated directions (inclinations).

The **advantage** with this is considerable as it gives **less drill meters** per ton of rock, **lower consumption of explosives**, reduced time for alignment etc.

Operation: -Turn the sight against an aiming point.  
-Adjust the feeder to the drill angles.

Installation: -Mount the instrument on a place on the feeder where it is easy to read.  
-Connect the power supply.  
-Zero sett the instrument by apply a magnet on the Z.

---

### Technical specification

Measuring range: side angle  $\pm 20$  degrees

inclination angle  $\pm 20$  degrees

Accuracy: better than 0.5 degrees

Power supply 12V-32V

Power consumption 0.2A

**TRANSTRONIC AB**
