

## CMD - General description

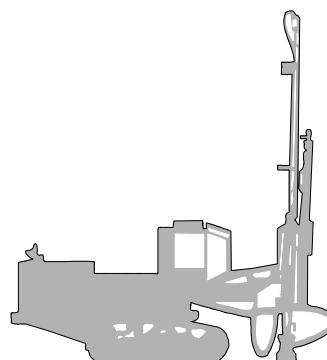

Fig. 1

This system is designed to measure the hole angles on a benching drill-rig. The system is easy to mount and operate on any type of drill rig. The system contents of one indicator and one angle transducer, signal cable and a power supply cable. See Fig. 1.

### General data

|                          |               |
|--------------------------|---------------|
| Power supply             | 12-28 VDC     |
| Power consumption        | 0,2 A         |
| Working temperature      | -20 - +50 ° C |
| Environmental protection | IP65          |

|                   |                    |
|-------------------|--------------------|
| Angle measuring:  |                    |
| Measurement range | 2 x $\pm 40^\circ$ |
| Accuracy          | $\pm 0.2^\circ$    |
