

Rugged tablet 094010

The tablet is an 8-inch Ulefone Armor Pad. Its ruggedness makes it suitable for "in the field applications". Water- shock- and dust-proof.

Highly visible in sunshine. With closed ports it is watertight enough to be used shortly underwater.

The size of the screen allow a good overview over the details of the software.

Good visibility and a logical layout of the interface, helps the user do his job.

Example on how the main screen on a CMX-UNI application can look.

Angles and length with ROP.

MWD-data activated = calculation of thrust on the drill bit.

Showing RPM, rotation and percussion pressure.

Drill plan imported and quality control of drilled holes.

Technical data
